

WHY DONATE?

Your whole body donation is a gift to science. You offer doctors, nurses, and many other healthcare workers the opportunity to advance medicine by developing new therapies and technologies.

There is no other training modality that can replace the human body when it comes to perfecting the art of medicine. From the young medical student to the seasoned neurosurgeon or scientist, your gift helps in so many ways. We can not thank you and your family enough for your donation.

WHY LIFE TREE ANATOMICAL?

In the State of Texas, whole-body donation is regulated by the State Anatomical Board (SAB). Life Tree Anatomical is the only non-university based Willied Body Program approved by the SAB.

We have this distinction for many reasons. Our program is run by physicians, nurses, and other end-of-life caretakers. We believe following strict regulations is a must, and we follow all Texas state laws. We only work with approved education organizations who have been vetted out to our highest levels. Our slogan is **“Texas First”** which means your whole body donation stays in Texas to support our Texas medical education system and training centers until all Texas needs are met. Other commercial whole body programs are not bound to these high standards.

We are dedicated to making the donation experience as meaningful and dignified as possible for the donors and their families. Here is what you can expect from Life Tree Anatomical:

- Professional, experienced, and compassionate staff available year-round.
- All arrangements will be made in person or electronically.
- Life Tree Anatomical files all necessary paperwork with your local county.
- **ZERO COST** to donate. All transportation, cremation and return of cremations is free.
- To start the process, call our staff at **512-402-8533**. We will personally help guide you throughout the entire process.

READY TO DONATE?

We are incredibly grateful for your generous donation. Here are some frequently asked questions:

Do I need permission from my spouse or next of kin?

If you are over 18 and of sound mind and body, you may donate your body without anyone else's consent.

Are there any expenses to me or my family?

No. Life Tree Anatomical takes care of the transportation, cremation, and return of ashes. We file all the paperwork with the State.

Can next of kin donate a loved one's body after they pass?

Yes. We will guide you through the process.
